

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Currently Amended): An information processing apparatus managing a first service of distributing contents of a first terminal in real time according to a reservation made in advance by the first terminal, and, to second and third terminal requesting the use of the first service and the use of a second service of providing a chat space, comprising:

an acquiring unit configured to acquire reservation information, sent by the first terminal, to the information processing apparatus from a reservation data base in order to provide the first service to the second and third terminals, the second and third terminals receiving a distribution notice in accordance with a second terminal email address and a third terminal email address of the reservation from the information processing apparatus, the distribution notice, including shared authentication data, a description of the first service, scheduling information and hyperlink data;

a generation unit configured to generate the chat space corresponding to the reservation at a predetermined time prior to a distribution start time designated by the reservation; and,

an authenticating unit to authenticate the second and third terminals by the use of the shared authentication data;

a providing unit configured to provide the chat space to the first terminal, and the chat space and first service to the second and third terminals designated to be distributed by the first terminal, the chat space and first service being provided to the second and third terminals simultaneously upon authentication, via actuation of the hyperlink in accordance with the scheduling information of the distribution notice, the providing unit delivering simultaneous access to the chat space and first service upon authentication of the shared authentication data at the information processing apparatus.

Claim 2 (Previously Presented): An information processing apparatus according to

Claim 1,

wherein the first service is a service for distributing contents sent according to a reservation made in advance, to the second and third terminals in real time.

Claim 3 (Previously Presented): An information processing apparatus according to

Claim 1,

wherein the first service is a service for providing the second and third terminals with a chat space corresponding to a reservation made in advance for distributing contents in real time.

Claim 4 (Currently Amended): An information processing method for an information processing apparatus managing a first service of distributing contents of a first terminal in real time according to a reservation made in advance by the first terminal, and, to second and third terminals requesting the use of the first service and the use of a second service of providing a chat space, comprising:

acquiring reservation information, sent by the first terminal, to the information processing apparatus from a reservation data base in order to provide the first service to the second and third terminals, the second and third terminals receiving a distribution notice in accordance with a second terminal email address and a third terminal email address of the reservation from the information processing apparatus, the distribution notice including shared authentication data, a description of the first service, scheduling information and hyperlink data;

generating the chat space corresponding to the reservation at a predetermined time prior to a distribution start time designated by the reservation;

authenticating the terminal by the use of the shared authentication data used by the server; and

providing the chat space to the first terminal, and the chat space and first service to the second and third terminals designated to be distributed by the first terminal, the chat space and first service being provided to the second and third terminals simultaneously upon authentication, via actuation of the hyperlink in accordance with the scheduling information of the distribution notice, the providing unit delivering simultaneous access to the chat space and first service upon authentication of the shared authentication data at the information processing apparatus.

Claim 5 (Currently Amended): A recording medium storing a computer-readable program for an information processing apparatus managing a first service of distributing contents of a first terminal in real time according to a reservation made in advance by the first terminal, and, to a second and third terminals requesting the use of the first service and the use of a second service of providing a chat space, comprising:

acquiring reservation information, sent by the first terminal, to the information processing apparatus from a reservation data base in order to provide the first service to the second and third terminals, the second and third terminals receiving a distribution notice in accordance with a second terminal email address and a third terminal email address of the reservation from the information processing apparatus, the distribution notice including shared authentication data, a description of the first service, scheduling information and hyperlink data;

generating the chat space corresponding to the reservation at a predetermined time prior to a distribution start time designated by the reservation; and,

authenticating the terminal by the use of the shared authentication data used by the server;

providing the chat space to the first terminal, and the chat space and first service to the second and third terminals designated to be distributed by the first terminal, the chat space and first service being provided to the second and third terminals simultaneously upon authentication, via actuation of the hyperlink in accordance with the scheduling information of the distribution notice, the providing unit delivering simultaneous access to the chat space and first service upon authentication of the shared authentication data at the information processing apparatus.

Claim 6 (Currently Amended): A computer readable carrier including computer program instructions to cause a computer to implement a method of managing a first service of distributing contents of a first terminal in real time according to a reservation made in advance by the first terminal, and, to a second and third terminals requesting the use of the first service and the use of a second service of providing a chat space, comprising:

acquiring reservation information, sent by the first terminal, to the information processing apparatus from a reservation data base in order to provide the first service to the second and third terminals, the second and third terminals receiving a distribution notice in accordance with a second terminal email address and a third terminal email address of the reservation from the information processing apparatus, the distribution notice including shared authentication data, a description of the first service, scheduling information and hyperlink data;

generating the chat space corresponding to the reservation at a predetermined time prior to a distribution start time designated by the reservation; and,

authenticating the terminal by the use of the shared authentication data used by the server;

providing the chat space to the first terminal, and the chat space and first service to the second and third terminals designated to be distributed by the first terminal, the chat space and first service being provided to the second and third terminals simultaneously upon authentication, via actuation of the hyperlink in accordance with the scheduling information of the distribution notice, the providing unit delivering simultaneous access to the chat space and first service upon authentication of the shared authentication data at the information processing apparatus.
